## **Puppy Dog Training Technique No. 1. Ring a bell to go out**

Hang a bell from the door that you use most frequently to let your dog outside. The bell should hang down at his nose level. Every time you take your dog out, ring the bell. Eventually your dog will ring the bell on his own, letting you know he wants to go outside. I suggest you do this first thing in the morning, after naps, after meals and after playtime.
